

creature COMfortS

Word Find:

Zookeepers watch their animals, on the lookout for wild behaviors that could use a boost. That's where enrichment plans come in – to help animals stay active. Pets display all kinds of behaviors, too. Just like a zookeeper, you can observe your pet and make plans to help your pet lead an active and healthy life.

Look for 27 action words that describe what pets can do. Find and circle the hidden words, listed at right. Words are spelled out forwards, backwards and diagonally.
